### DETAILED ACTION

Due to the complex nature of the claims, no request for an oral election is being made.

Please see MPEP 812.01.

#### *Election/Restrictions*

Claims 1-30 are generic to a plurality of disclosed patentably distinct species comprising both (a) SRI antidepressants and (b) 5-HT<sub>3</sub> receptor antagonists. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each class of compounds, even though this requirement is traversed. Furthermore, to assist the examiner in her search, applicant is respectfully requested to provide the structure of the elected compounds if species from Markush structures are elected.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
